Manu Fourneau

Full-stack Web Developer

Mid-level full-stack web developer experienced in building scalable corporate web applications. Six years of experience across the tech industry, with a background in cybersecurity.

WORK EXPERIENCE

Fullstack Web Developer - Consultant   September 2021 – Present
Inetum - Realdolmen, Brussels, Belgium

- Developed and maintained industrial web applications for Daikin Industries, a global leader in air conditioning solutions, using cutting-edge web technologies.
- Used Angular and React frameworks to build intuitive and user-friendly interfaces.
- Collaborated with cross-functional teams, including designers, product managers and the customer itself to gather requirements and implement features effectively.
- Employed Python and .NET to create efficient backend APIs, enabling seamless integration between the frontend and backend systems.
- Successfully led the design and implementation of key application infrastructure by leveraging AWS technologies such as Lambda, DynamDB, Eventbridge and SQS.

Account Manager   January 2021 – August 2021
Savaco, Kortrijk, Belgium

- Managed a portfolio of key corporate accounts, fostering strong relationships and ensuring customer satisfaction.
- Kept abreast of industry trends, activities, and market developments, providing valuable insights and recommendations to the management team.
- Participated in trade shows, conferences, and networking events to expand the client base and foster new business opportunities.

Cybersecurity Architect   January 2018 – January 2021
Savaco, Kortrijk, Belgium

- Led the design and implementation of comprehensive cybersecurity solutions for large corporate customers, ensuring the protection of sensitive data and critical infrastructure.
- Developed and enforced security policies and standards, ensuring compliance with industry regulations.
- Worked in close relation with sales and project management teams to find optimal solutions taking into account budget and scope.
- Conducted regular security audits and penetration testing, identifying vulnerabilities and recommending remediation measures to strengthen the overall security posture.
